Subject: Microsoft Settlement

Dear Judge Kollar-Kotelly,

I am writing this to urge you to reject the proposed Microsoft settlement. I believe the settlement as it currently stands would neither punish Microsoft for the anti-competitive actions it has taken in the past, nor prevent it from repeating them in the future.

On the contrary, it think it would provide MS with additional ways to strengthen it's monopolistic grip on our country's home and business software. I believe that the only remedy to this problem is to subdivide Microsoft into separate business entities that would compete in the marketplace with each other and other technology companies.

Sincerely

Tom Szymanski
